

Get the right technology solution

Choose an Intel® Premier Provider

You Need to Know You're Working with the Best

Your investment in business computing and communication systems—servers, desktop and mobile/wireless PCs, and the networks that connect them—depends on working with an experienced technology professional to specify and deploy those solutions. You need someone with the training, knowledge, and experience to understand your objectives and satisfy your needs reliably and cost-effectively.

Talk to an Intel Premier Provider

Premier Providers are highly engaged with Intel. Their knowledge of Intel technology solutions, product functionality, and reliability are what you are looking for in a technology professional. To maintain their status as a Premier Provider they must demonstrate their world-class implementations to Intel annually.

Intel Premier Providers Stand Above the Crowd

Your Intel® Premier Provider is more than another technology vendor. Premier Providers are admitted to Intel's most prestigious reseller program by invitation only. Each must demonstrate product knowledge and business experience. And, they have access to training and technical information from Intel, when they need it.

Look for the symbol that stands for Intel-based solutions: the logo of an Intel Premier Provider.

## An Intel® Premier Provider can ...

You deserve the best:  
Intel technology solutions from  
a technology professional.  
Choose wisely and consider  
the benefits of working with  
a member of Intel's most  
prestigious reseller program:  
an Intel Premier Provider.

### Listen

to your requirements and help you maximize the value of your technology investment. Premier Providers have access to training on Intel products and solutions that are compatible with other hardware and software solutions. Ask your Premier Provider to design a solution with the depth and capacity to help answer tomorrow's technology needs as well as today's.

### Help

you with your specific technology needs: Some Premier Providers focus on servers and the network infrastructure they are connected to, while others may work primarily on PCs or mobile/wireless communications.

### Obtain

accelerated product replacement from Intel that enables them to receive replacement Intel products more quickly, allowing them to keep your systems up and running with greater reliability. And, Premier Providers have priority access to technical support, allowing them to serve you more promptly and efficiently.

### Attend

regular training events and must maintain certain certifications to keep their knowledge and skills current. Their commitment to continual training reflects the professional dedication to excellence you are looking for.
